

Trailblazer Signs on city or town right-of-ways

SR 13 near Old Indiana 132 *and* Old Indiana 132 near Main Street are not state-governed right-of-ways. These stretches of roadway are considered 'Vine Street' and 'Pendleton Avenue,' respectively, and the town of Lapel oversees both of these right-of-ways. Pax is seeking council approval to have these signs placed.

Information regarding the Trailblazing Signs

- Our Trailblazing Signs are single-post signs, standing approximately 8 feet tall (at times these signs can be mounted to existing structures, should a town/county request it)
- The logo sign is 24" x 18" in size, while the blue background panel is 30" x 30" in size (example photo attached)
- Signs are typically placed 200 feet prior to the interchange, though the town/county could adjust this location based on its preference/requirements
- Signs are typically placed several feet off of the roadway, though the town/county could adjust this measurement based on its preference/requirements
- This sign locations would be located at the following intersections:
 - directly south of the Vine Street and Old Indiana 132 intersection (directing northbound motorists)
 - directly east of the Old Indiana 132 and Main Street intersection (directing westbound motorists)
- Failure of the city/town/county to approve this signage (or to provide adequate wayfinding signage) would prohibit your business from participation in the Specific Service Sign Program (this information is sometimes beneficial for city leadership to understand, as a lack of signage can result in lesser economic success for the participant, and thus, the city/town/county as a whole)

I am happy to provide the town with any additional information that they may need, or answer any questions that they may have. Again, if you can provide this request to the town/county, I can be technical support to aide in that request.

I can be reached directly at 317.500.1134 or toll free at 1.800.288.LOGO (5646).
